### How has Covid changed the way we are approaching discipleship in the home?

The good news is that...

- Online meetings become common place.
- Increase in online resources and people who provide them
- Highlights value given to face-to-face church relationships

The bad news is that...

- Kids grew up in an era of stress. At first it was good to be home, but...
- Church attendance drops and habits form—priority shift
- Online discipleship for children especially difficult

## #2

### What new approaches are likely to develop for effective discipleship in the home

Shift: From church-centered, home supported to also home-centered, church supported

Shift: From content-driven to context-sensitive

Shift: From program-centered to preference biased navigation
